### **Description:**

Konvertor diakritiky replaces all chars with diacritical marks to chars without this marks.

### **Localization:**

Include language file (*dconv.xml*) for easy localization. Default languages are Czech and English. If you have interest, you can fill your own language to existing language file. Please, do not modified the original language strings! If you created a new language, send me it to public on the WWW page of this application. It will be fine to download by others users.

### **Instalation:**

If you downloaded setup file, runs it and follow commands on the screen.

### **License:**

Please see the file *license-en.pdf*.

### **Copyright:**
